## FOR PEOPLE WHO WON'T COMPROMISE ON QUALITY

**Welcome to Stencil®.**  
**With a range of classic, smart and elegant mens and ladies wear, Stencil® creates apparel suitable for every workplace.**

Since 1996, Stencil® has developed new materials and styles exclusively for the Australian wholesale uniform market and remains dedicated to creating high quality garments for the Corporate Promotional, Retail, Government, Hospitality, Health and Aged Care, Transport, Club and many other Industries.

What sets Stencil® apart from their competitors is a focus on the development of innovative new high-performance fabrics. Stencil® fiercely controls the quality of their products by controlling every step of the manufacturing process – from textile research and manufacturing through to design and production of the finished garments to ensure both our Resellers and their customers' expectations are met.

The background of the entire image is a close-up, high-resolution photograph of a blue fabric, likely a shirt or singlet, showing deep wrinkles and folds. The lighting creates a gradient of blue tones, from a darker, more saturated blue in the shadows to a lighter, slightly more vibrant blue in the highlights. A solid purple horizontal band is positioned across the middle of the image, serving as a backdrop for the text.

# MEASURING TIPS FOR STENCIL® GARMENTS

**IMPORTANT:** half-chest measurements throughout this catalogue reflects finished garment dimensions, not 'to fit' sizing. Please take this into consideration when ordering.

## CHEST

Measure your chest from right under your armpits. Make sure that the highest point of your chest and your shoulder blades are included in the measurement.

## SLEEVES & BACK LENGTH

With your arm hanging slightly bent & relaxed, measure from the point of your shoulder down to your wrist. For the length of the garment, measure from neck seam to hem.

## NECK

Measure the base of your neck, or take a measurement from a collared shirt that fits well. Pressing the collar flat, take your measurement from the centre of the button to the end of the button hole.

## GARMENT STYLES & SIZING

Different garments are designed to offer different fits. Some have a loose profile, while others are trimmed in around the waist and have structured shoulders.

Garment sizing varies between brands and styles.

The best way to ensure a good fit is to go by your physical measurements - not your current shirt size. To get the perfect size, lay your favourite shirt flat on a table and measure the chest. By selecting a size that is close to your favourite shirt's measurements, you will ensure a good fit. All measurements are within a tolerance of 1 – 1.5 cm.

## WASHING

Remember that Cotton garments can shrink as much as five percent! This is especially important for sleeve lengths and neck fittings. For the best results, always follow the care instructions sewn inside your garment.

*Matt, the male model on the **back cover page** is 185cm and wears a size medium.*

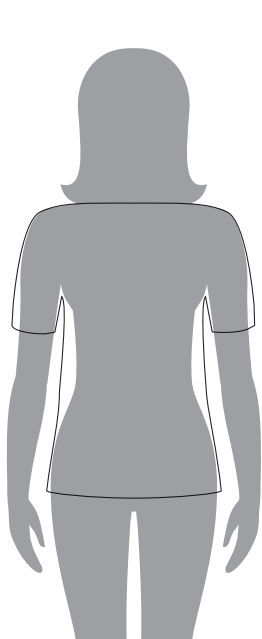

*Shannon, the female model on the **front cover page** is 179cm and wears a size 10*

# FIT STYLES FOR STENCIL GARMENTS

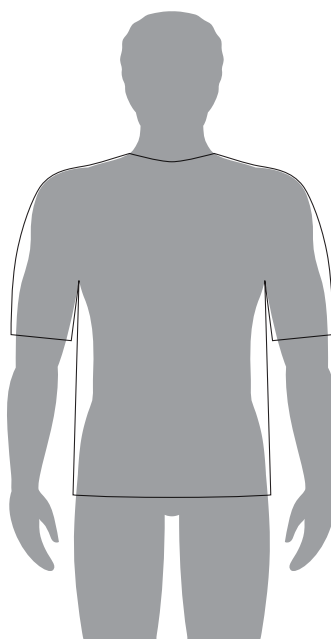

## POLO AND SHIRTING

In addition to half-chest measurements, our Polo and Woven shirts now also list a 'fit' style to help you choose elements that better suit your organisation's uniform requirements. There are four main styles of fit, as shown below.

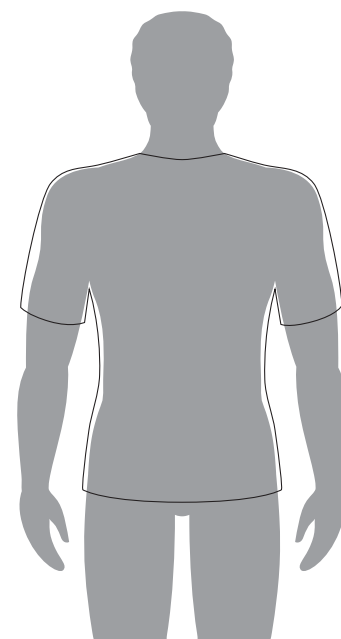

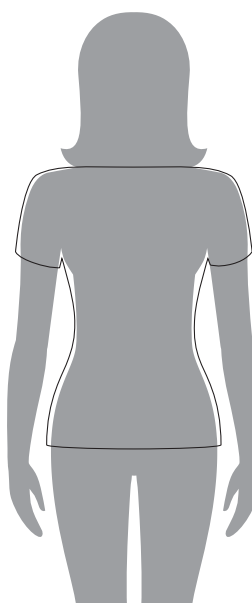

### Easy Fit

A slightly relaxed fit with generous measurements and ample room to move.

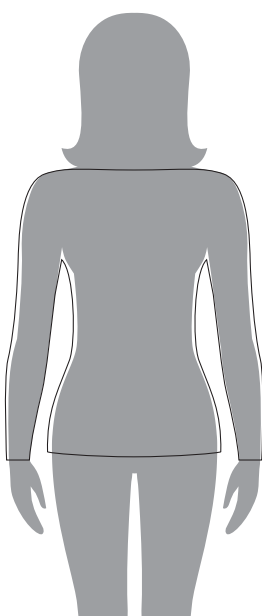

### Modern Fit

A contemporary fit designed to flatter the wearer, with slight tapering through the waist.

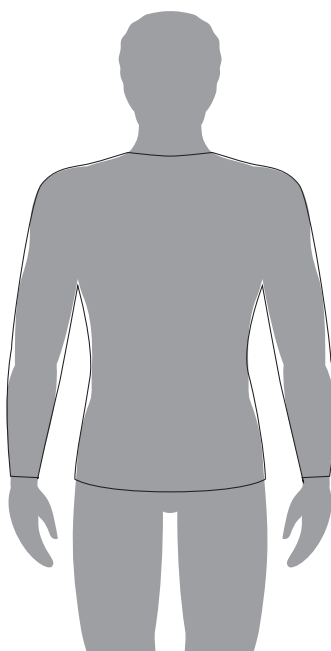

## TOP AND SHIRTING

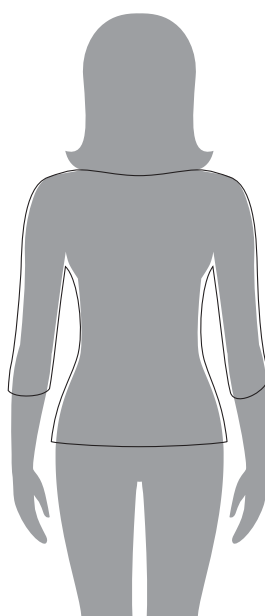

### Semi-Fitted

Gently shaped through the torso. Follows the contours of the body for ease of movement. Go one size up for an easier fit.

### Tailored Fit

With carefully placed darts and seams, our tailored fit garments will accentuate your figure to create an elegant silhouette.

# STENCIL<sup>®</sup> INDENT ORDERING

Indent is a term used for Custom Factory Orders, developed and manufactured to your company's requirements in our overseas facilities.

Because your order is being custom-made, indent ordering gives you access to decoration features and techniques that aren't available with the usual stock items. We can even create custom fabrics, special colours and garment designs on request.

If you need a logo or other detail on your new garments, Stencil can help with that as well. We provide printing, embroidery and transfer services undertaken by the original supplier during manufacture – giving you more options for placement, size and colour than with pre-assembled clothing.

With a near-limitless combination of fabric, design and decoration options, indent is ideal for companies who are willing to plan ahead to get the right result. Speak to one of our sales representatives to learn how indent ordering can fulfil your company's specific needs.

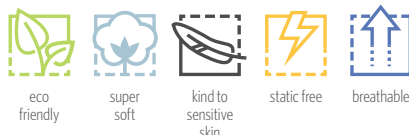

The minimum order quantity for indent orders varies from product to product, but can be as low as 400 units of the same colour (e.g. 400 mens, 400 womens, or 200 mens + 200 womens) from any one range in this catalogue. The lead times so please contact your Representative for more information.

## ECO-THREAD® COLLECTION

Produced using an eco-friendly manufacturing process, the Eco-Thread® Collection blends plant cellulose with classic natural fabrics. Super soft and kind to sensitive skin.

## COFFEE CHARCOAL

Uniquely eco-friendly and anti-bacterial, the Charcoal Range has a natural deodorising function, and offers natural moisture wicking and breathability. Kind to sensitive skin, Coffee Charcoal is highly UPF resistant and easy to care for, requiring no ironing.

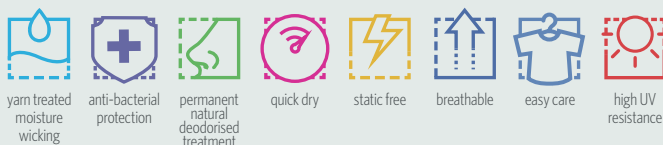

## DRYMAX RANGE

The very latest in active comfort technology, DryMax® performs like no fabric before. With high-throughput active wicking to pull heat and sweat away from the skin for rapid evaporation out of the fabric, DryMax® garments are ideal for sports and high-pressure work environments alike.

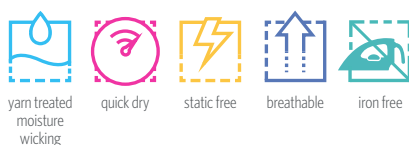

## SILVERTECH® RANGE

A blend of Cool Dry® and nano-scale silver yarn-treated thread, SilverTech® takes feeling fresh to a new level. One of the oldest anti-bacterials known to man, silver fights odour from inside each thread of the fabric. This nano-scale yarn treatment won't wash out, keeping you fresher for the life of the garment.

## ICE-COOL RANGE

The next generation of Cool Dry®, Ice-Cool takes comfort to a new level. Specifically designed to draw heat away from the wearer, Ice-Cool's unmatched moisture wicking and anti-bacterial qualities mean your polo will stay fresher longer, no matter what you're doing.

## COOL DRY® RANGE

Stencil Cool Dry® products are yarn treated to provide a long-lasting cool dry effect introduced into the Australian market in 2002. Stencil Cool Dry® has a very soft and silky texture and is manufactured using high quality yarn and the latest technology. Cool Dry® is a registered trade mark.

# UPF CLASSIFICATION

**NOTE:** The ratings for each garment style are based on the lowest score across ALL colours so please check with us if you specifically require a 50+ UV garment so we can give you all options.

### UPF RATING AS USED BY ARPANSA

UPF RATING	PROTECTION CATEGORY
15-25	Minimum
30-45	GOOD
50,50+	Excellent

## FAQS

### WHAT IS A UPF RATING?

A UPF rating shows how effective fabrics are at blocking out the sun's rays and reducing a person's UVR (Ultraviolet Radiation) exposure.

All fabrics have some ability to block UVR, but laboratory testing is needed to tell how useful different fabrics are for sun protection by measuring the Ultraviolet Protection Factor or 'UPF' rating of the fabric.

### WHICH FABRICS HAVE THE HIGHEST UPF RATING?

Synthetic fibres such as polyester, lycra, nylon, and acrylic are more protective than bleached cottons? The tighter the knit or weave, the smaller the holes and the less UV can get through.

### CAN THE UPF RATING VARY WITH DIFFERENT COLOURS OF THE SAME FABRIC?

Yes they can. Darker colours tend to absorb more UV which helps reduce exposures than lighter colours, but bright colours such as red can also substantially absorb UV rays. The more vivid the colour, the greater the protection.

Some pale coloured fabrics, including white can offer good protection. Some pale coloured fabrics, including white can offer good protection if the weave, material, weight, etc. are effective at keeping out UV.

# PMS CHART POLO RANGE

DISCLAIMER: The PMS colours below are a **guide only** as fabric dye lots have a minimum variation from batch to batch and PMS colours cannot be matched exactly with fabric. Colours will also vary depending on device or screen they are being viewed so we **cannot guarantee a 100% match**. We strongly suggest purchasing a sample garment for accurate colour assurance.

There is also some duplication of colour names so please check the style code below each one to ensure you are matching the correct colour to garment style.

## Ethical Statement

At Stencil, we aim to minimise both the consumption of raw materials and the quantity of clothing consigned to landfill by producing hard-wearing quality garments designed with consideration and concern for the environment.

While we are expanding our range of garments with fabrics specifically developed for their eco-friendly qualities and manufacturing characteristics, we continue to preference plant derived synthetics and natural fibres across all our collections, and will continue to increase the proportion of organic materials used in our supply line. We recognise this is a starting point and continue to head towards greater levels of environmental responsibility with each passing year.
